

InnoDynamics

INNOVATIVE SMART CHANGING

COMPANY BACKGROUND

InnoDynamics Technologies Limited (“InnoDynamics”) (formerly known as “NSF Board Asia Limited”) was established in 1999 to provide professional audio-visual and technology solutions for corporates, universities, and residential projects. Our mission from the very first day has been to cultivate professional relationships with our clients to provide effective and reliable audio-visual and technology solutions for their needs. The team at InnoDynamics is equipped with a highly developed skillset, developed over decades of experience not only in professional audio-visual but also in smart office technologies across a wide range of industry sectors. This business experience makes us uniquely positioned to offer solutions promising greater operational efficiency, productivity gains, and cost savings for each of our clients, regardless of their industry. At InnoDynamics, we guarantee rapid, reliable and robust technology solutions that work.

As an established technology-intensive company, we pride ourselves on providing a comprehensive suite of solutions comprising of:

- **Requirements Consultancy**
- **System Design**
- **System Installation and Engineering Management**
- **Software Development for Smart Office Integration**
- **Users Training**
- **Maintenance & Upgrades**

SMART PRO

FOR SMART INNOVATIVE PRODUCTS

InnoDynamics provides a full range of integrated digital technology, from software for content creation and distribution to customized display hardware, interactive technology and sensors. We help customers create a stunning digital canvas to meet any digital signage need, from a single LCD display to a large video wall. Providing 24/7 reliability and impressive image quality, our solutions offer unlimited freedom for a wide variety of applications such as shops, airports, stations, offices, hotel lobbies, museums, restaurants, universities, convention centers, stadiums and many more.

Digital Signage System

Digital signage system is an effective and engaging communications medium for marketing, entertainment, security and education, enabling you to create a more interactive, real-time experience in store, on campus, on your workforce and in numerous other locations.

Video & Audio Conference

With our extensive experience in audio-visual solution, we can provide our clients with a high-definition and low latency video conference experience. This enables the team to seamlessly interact with each other and thus achieving common goals.

INNOVATION

bring
your own
device

BYOD (Bring Your Own Device) Solution

BYOD refers to the use of your own mobile device such as smartphones, tablets, and laptops, to wirelessly share media with the others in the same network. We offer BYOD solution that facilitates quick and wireless sharing of information and ideas in the business world. Wired connection is no longer required and instant information sharing among multiple parties is now possible.

IP Phone System

IP telephone system enhances business efficiency and saves cost by providing better integration with existing IT system. Employees can access company telephone anytime and anywhere. Furthermore, the IP Phone systems of multiple branch offices can be managed by a single simple user interface. InnoDynamics offers total solution of consultation, design, integration, and installation of telephone system tailored to your need.

Meeting Room Booking System

Meeting room booking system makes it easy for you to manage rooms and resources. It provides information about room availability and allows you to book a room anywhere and anytime.

OUR SERVICES & EXPERIENCE

Professional Audio-Visual Solution

Audio-visual total solution is our company's core focus and strength, our team has more than 20 years in providing professional audio-visual solution to the universities and large enterprise clients in Asia. We offer the most advanced and user-friendly audio-visual and central control systems that are tailor-made to fit different applications and meet our clients' unique requirements. We have extensive experience in different audio-visual applications including: business centre, reception lobby, boardroom, conference room, training room, press room, show flat, retail outlet, VIP lounge, etc.
