- System Design and Equipment Procurement
- System Installation and Engineering Management
- Software Development for Smart Classroom Integration
- Users Training
- Maintenance & Upgrades

## System Integration & Smart Control for Lectures Theatre

Successful learning depends on the effective implementation of innovative and creative teaching methods. The larger the venue, the harder the configuration of AV systems will be. We are capable of overcoming all possible problems for setting up a grand theatre hall with diversified multimedia systems deployed. Our proven expertise in integrating audio/video distribution, AV systems integration, professional audio system, central control system, and more, can fulfill any demands from customers with steady performance.

Automation Solution streamlines and incorporates all the technology in the room, achieving ultimate convenience and comfort at a fingertip. By integrating in-room control systems, teachers do not need to walk around the room to adjust drapes, screens, lights scenes, temperature, and audio/video components. A centralized panel, saving much time for teachers to operate different equipment in limited lecture times, can remotely control everything.

## Streaming and Broadcasting Solutions for Events

Sometimes schools organize events by premier guest speakers and business leaders that have more attendees than can fit in even their largest lecture halls. To make the most of these lectures and accommodate a wider audience, the universities want to live stream these events.

Our company help the Universities installed and implemented the audio-video; lighting and central control system that are able to simultaneously run online streaming to off-campus viewers; streaming to the school's streaming media server (for on-campus viewers and overflow rooms); captures an HD video source such as a computer with slides, and a camera focused on the presenter and a microphone. The streaming content of the presentations, events, Lectures can also be recorded to internal storage and network storage.

## Teaching Wall and School Furniture

Teaching board and projection system are the major equipment in schools. The teaching boards we offered are the top quality amongst the market. It combines an elegant design with extended choices of colors to give an inspiring environment in the classroom. We offer thousand of flexboard to International schools with light rounded edges, round edges, round corners and plastic protection end caps in signal color on the full length chalk rail and concealed fitting.

Nowadays, schools also select furniture focusing on flexibility, functionality, design, safety and color selection. The furniture from Denmark has an organic design which creates room for creativity, play and learning
